Unit 3

Protect Nature, Protect Future

Learning Outcomes

Reading
- Read articles and texts on climate change, climate justice, and global environmental issues.
- Extract key details, define vocabulary from context.
- Understand cause-and-effect relationships.

Language
- Use modal verbs for logical deduction in the present and past.
- Express blame or regret.

Listening
- Extract key information from an audio conversation, specifically a radio interview with a meteorologist.

Writing
- Write a persuasive essay on the topic of climate change, using specific vocabulary and persuasive techniques.

Speaking
- Participate in group discussions and debates about climate change, its effects, and the role of individuals and youth activists.

Climate Justice and Global Activism

Climate change must be seen not only as an environmental crisis but also as a profound issue of global justice. While industrialized nations are largely responsible for the majority of greenhouse gas emissions(1), it is often low-income and marginalized communities(2)—particularly in the Global South—that bear the brunt(3) of its consequences. These populations might face rising sea levels, long droughts(4), food shortage, and extreme weather(5) events that threaten their health, and safety.

(1) الانبعاثات (2) المجتمعات المهمشة
(3) تتحمل العبء الأكبر (4) الجفاف
(5) طقس شديد/قاسٍ (6) ملموس
(7) إنصاف

Climate justice emphasizes that we cannot ignore these effects. It calls for fair policies, shared decisions, and cooperation to fix the unequal burdens of climate change. People who cause the least damage must not suffer the most.

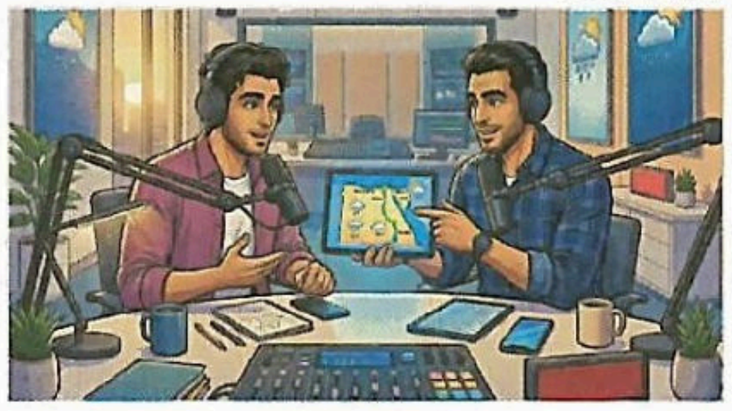

Youth around the world are actively working to stop climate change, showing great leadership and creativity. One initiative is the "Youth Climate Lab" which empowers young innovators to develop solutions for climate challenges, such as creating sustainable energy projects or designing waste reduction programs. Their efforts have resulted in tangible(6) changes, like the implementation of community solar projects and successful recycling campaigns in various regions. At its core, climate justice is about equity(7), responsibility, and giving a voice to those who are often unheard in global debates. Without justice, there can be no true solution to the climate crisis.

Choose the correct answer from a, b, c, or d:

1. **According to the text, young people are demanding .....**
   a) higher taxes on developing nations
   b) a return to traditional farming methods
   c) immediate and ambitious climate action
   d) more international travel opportunities
2. **The term "bear the brunt" in the text means "....."**
   a) to create the solution
   b) to suffer the worst effects
   c) to support others financially
   d) to avoid responsibility
3. **What does climate justice call for?**
   a) More industrial development.
   b) Equal carbon emissions for all.
   c) Fair policies and global cooperation.
   d) Isolating the most polluting countries.
4. **Who is playing a major role in addressing climate change, as mentioned in the text?**
   a) Retired scientists.
   b) Young people across the globe.
   c) CEOs of oil companies.
   d) Farmers in the Global North.

(1) خبير أرصاد جوية — (2) جمهور
(3) مذيع — (4) عقد زمنى
(5) موجة حرارة — (6) متفائل
(7) متشائم

Presenter : Good evening, listeners.

With the recent scorching heat across Egypt, one topic everyone's talking about is, yes, you guessed it, the weather.

Joining us today in the studio is meteorologist(1) Tamer Mansour.

Earlier, we asked you to share your questions, and now Tamer's here to answer a few.

Welcome, Tamer.

Tamer : Thanks, great to be here.

Presenter : First question from our audience(2). What's the difference between a meteorologist and a weather presenter(3)?

Tamer : Well, a meteorologist collects and analyzes weather data, while a presenter simply delivers that information, usually on TV or radio. Some presenters are trained meteorologists, but not many.

Presenter : And how far ahead can you predict the weather?

Tamer : Usually, five to seven days. But some weather types are easier to predict than others.

Presenter : Have you noticed any changes in Egypt's weather over the last decade(4)?

Tamer : Not dramatically, but this year's heat wave(5) is unusual. Extreme weather might be becoming more frequent globally, and it certainly seems to be getting hotter.

Presenter : Are you optimistic(6) about climate change?

Tamer : Honestly, I'm a bit pessimistic(7). In Egypt, we'll likely face more extreme heatwaves in the future.

Presenter : Thanks, Tamer. Fascinating insights, and hopefully cooler weather soon!

B Language

Modal verbs of deduction الأفعال التى تعبر عن الاستنتاج

يمكن استخدام بعض الأفعال الناقصة Modal verbs لبيان درجة التأكد من شىء سواء فى المضارع أو الماضى كالآتى:

PRESENT المضارع

Degree		Rule		Example
Certain مؤكد	100%	am/ is/ are (أو أى فعل آخر)		My father is a doctor. My father works as a doctor.
Near certain شبه مؤكد	90%	must be must + inf.	أكيد	Ali's father has two cars. He must be rich. Ali has lived in London for 10 years. He must speak English well.
Uncertain غير مؤكد	50%	may be	ربما	It isn't certain that he's alive. He may be alive. They may visit us tomorrow, but I'm not sure.
Very Uncertain غير مؤكد جدا	30%	could be might be	ربما ربما	I don't know why Hany hasn't come to the party. He might/could be ill.

PAST الماضى

Degree		Rule	Example
Certain مؤكد	100%	was/ were (أو أى فعل آخر)	The exam was easy; everyone passed. My brother traveled abroad yesterday.
Near certain شبه مؤكد	90%	must have + P.P.	She got the full mark. She must have studied very hard.
Uncertain غير مؤكد	50%	may have + P.P.	I can't find my keys. I may have left them in the car.
Very uncertain غير مؤكد جدا	30%	might have + P.P. could have + P.P.	He didn't answer the phone. He might have been asleep.

لاحظ

1 يأتى المصدر بعد الأفعال الناقصة ولكن فى الاستنتاج فى المضارع غالبًا نستخدم verb to (be) بمعنى يكون وبعده اسم أو صفة وإذا لزم الأمر نستخدم المصدر من أى فعل حسب المعنى.

2 لاحظ النفى فى جمل الاستنتاج مع الأفعال الناقصة.

Affirmative الإثبات	Negative النفى
must be لابد أنه	can't be لا يمكن أن يكون
must have + P.P. (ماض) أكيد	can't have + P.P. (ماض) لا يمكن أن
may/ might + inf. من الممكن أن يكون	may not/might not + inf. من غير الممكن أن يكون
could be من الممكن أن يكون	couldn't be من غير الممكن أن يكون
could have + P.P. (للماضى) ربما	couldn't have + P.P. (ماض) من المستحيل أن

وهذا شرح لاستخدام كل فعل من الأفعال الناقصة بالتفصيل:

1 must

تستخدم must عندما نشعر بأن شيئًا ما حقيقى بسبب وجود دليل قوى.

Examples

He must live near here because he comes to work on foot. (We're sure it's not far away.)
You're a zookeeper! That must be very interesting.
You must have been happy when you heard you'd passed the exam.
Oh no! Where's my car? Someone must have stolen it!

2 might/may/could

تستخدم might, may, could عندما نعتقد أن شيئًا ما ممكن ولكن لسنا متأكدين بدرجة كبيرة.

Examples

We'll try to get there early but we may arrive late if there's a lot of traffic.
Don't put the vase up there. It could fall off and hit someone.
The thieves might have escaped by car, but we aren't sure.
I can't find my purse. I could have left it in the supermarket, but I don't know.

3 can't

تستخدم can't عندما نشعر بأن شيئًا ما غير حقيقى بسبب وجود دليل قوى.

Examples

He has to work on the feast day! He can't feel very happy about that.
Osama can't be in the garden. He is still asleep.
I thought I saw Ramy in town this morning, but it can't have been him—he's in Greece this week.
I can't have left my bag in the supermarket—I had it on the bus on the way home.

لاحظ

1 عند صياغة المبنى للمجهول فى المضارع نضيف be بعد modal verb ثم التصريف الثالث:

The movie may be shown again for those who haven't seen it.

2 عند صياغة المبنى للمجهول فى الماضى نضيف been بعد have ثم التصريف الثالث:

His bag may have been left on the train.

3 من الممكن استخدام may have + P.P. للمستقبل التام فيجب ملاحظة الفرق بين الزمنين.

In 30 years' time, we may have used solar energy in all our homes.
Ali got low marks in yesterday's exam. He may have wasted his time playing.

4 عندما يكون الاستنتاج لحدث مستمر فى المضارع نستخدم must/may/might/could be +v-ing

The lights are on and I can hear music. They must be having a party.
He isn't answering his phone. He might be sleeping.

https://t.me/G5_Y5

5 عندما يكون الاستنتاج لحدث مستمر في الماضي نستخدم must/may have been + v-ing

When I called him, he didn't pick up. He must have been driving to work.

She looked very tired yesterday. She might have been working all night.

6 could have + P.P. لها معنيان:

١- الاستنتاج: ربما مثل: (might have + P.P.)

He didn't attend the party yesterday. He could have forgotten the time or missed the way.

٢- القدرة الضائعة: «كان بإمكانه فعل شيء لكنه لم يفعله»، مثل:

I could have won, but I didn't try.

He went to school on foot, but he could have taken the train.

Global Climate

(1) مصحوبة (2) ظاهرة
(3) يكشف (4) معرض
(5) مدن عملاقة (6) هجرة مناخية

Scientific data indicate that global sea level in 2016 was approximately 82 mm higher than the 1983 average. Projections suggest a potential rise of 0.2 to 2 meters by 2100. This trend is accompanied[1] by a documented increase in the frequency of coastal flooding in numerous regions compared to mid-20th-century levels.

The phenomenon[2] is primarily driven by two connected mechanisms: (1) The accelerated melting of glaciers and ice sheets due to rising global temperatures, which has become the dominant contributor to sea level rise over the past decade. (2) Thermal expansion of seawater as ocean temperatures increase. These processes are expected to intensify[3] under current climate change scenarios.

The implications are severe, with an estimated 275 million people currently residing in low-lying coastal zones exposed[4] to floods. Notably, the majority of the world's megacities[5] are situated in coastal areas, including several major European urban centers facing significant flood risks. Climate migration[6] models predict large population shift in coming decades.

Choose the correct answer from a, b, c, or d:

1. In 2016, how much higher was the global sea level compared to the 1983 average?
   a) 8.2 cm.
   b) 82 cm.
   c) 8.2 mm.
   d) 2 meters.

2. What is the projected range for sea level rise by 2100?
   a) 82 mm to 2 meters.
   b) 0.2 to 2 meters.
   c) 20 cm to 82 cm.
   d) 275 million to 2 billion meters.

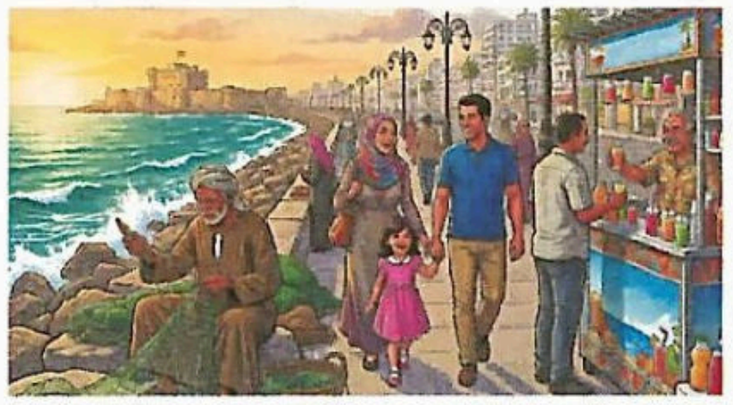

3. What is the main driver of sea level rise over the past decade?
   a) Coastal flooding.
   b) Thermal expansion.
   c) Melting glaciers and ice sheets.
   d) Population growth.

4. What is the other main cause of sea level rise besides melting ice?
   a) Increased coastal flooding.
   b) Population shifts.
   c) Rising humidity.
   d) Thermal expansion of seawater.

Climate Change and Coastal Cities

Coastal cities such as Alexandria face great risks from climate change. As global temperatures rise, glaciers[1] and ice sheets melt, and sea levels increase. Scientists emphasize that even a small rise in sea level can cause serious flooding in low-lying areas that can stop business for days. This must be one of the greatest threats to homes, schools, and hospitals. Experts warn that the damage might be worse than many people think, and floods[2] could be happening more often in the near future.

In Alexandria, many people live close to the sea. They notice that the waves[3] are stronger and sometimes reach the streets. Families worry about their homes, and shop owners worry about their shops. But they also take precautions[4] to stay safe. Fishermen explain that the sea is changing. They say the waves must have been caused by global warming[5], since storms can't have become stronger for no reason. They flooded already. Still, people remain hopeful and try to prepare in advance.

The state is also working to reduce the dangers. It builds seawalls[6] to protect neighborhoods and invests in renewable energy to reduce pollution. Authorities[7] run awareness campaigns[8] to teach citizens how to act during storms. Officials admit that without these measures, the losses might have been far greater. With these efforts, the risks may be reduced, and Alexandria can remain safe for future generations.

Many experts also argue that we shouldn't have ignored the problem of climate change. Citizens should have taken more responsibility for reducing pollution in their daily lives.

MODEL ESSAY

Climate change is not something far away or invented. It's happening right now, all around us, and getting worse every year. The Earth is heating up because we burn too much coal, oil, and gas. This pollution traps heat in our atmosphere, causing wilder storms, longer droughts, melting ice, rising seas, and animals losing their homes. Scientists have warned us for decades. They're not guessing — they're sure. And the people suffering most are those who did the least to cause it — poor communities, small islands, and children.

We can still fix this — but only if we act fast. We must switch to clean energy like solar and wind. Governments need to pass strong laws and stop giving money to dirty energy. Big companies must stop wasting and start caring. And you? You matter too. Use less, recycle more, eat less meat, walk or bike when possible, and tell others you care.

Waiting is dangerous. Doing nothing costs more — in lives, money, and lost futures. This is about fairness, safety, and love for the only planet we have. Let's not leave our kids a broken world. The time to act is now — together.

(A) Reading Comprehension

قاموس بالكلمات الجديدة في قطع الفهم نهاية الكتاب.

1 Read the following passage, then answer the questions:

Computers are gradually replacing human labor in many areas of our lives. An important area of computer technology is the use of computer systems to perform jobs which require intelligence, such as learning how to sing or spotting familiar objects. Most computers cannot do these things because they do not have a "brain" to think. However, things are changing as people come up with newer and smarter computers.

Computer scientists have come up with computers which can "think". These special computers do not actually have "brains" but are fed with many facts and pieces of information about the job they are built to do. For example, there are computers which can identify which area contains gold or other materials. They learn about the important qualities of the mineral, such as its color, weight, and the areas where it is most likely to be found. This makes it easier for the computers to spot the mineral in different parts of the world.

Computers can also be used in factories. Businessmen and factory owners use computers in the form of robots. These robots contain computer systems that enable them to perform the job they are programmed to do. A single robot can do a job which would take three people to do; this saves businessmen precious time. There would no longer be any need to train workers for different tasks, and it would be cost-effective for employers as well.

In the time to come, it is possible that computer systems will take away many jobs. However, there is also an increased need for people who can build, design, and repair computers. Thus, not all jobs will disappear in the near future.

2 Read the following passage, then answer the questions:

Every year, thousands of accidents occur simply because drivers lose focus for a few seconds. One morning last year, a man was driving through the center of the town, distracted by the shops. Suddenly, a pedestrian stepped off the pavement and was struck by the car. The impact threw the person onto the bonnet before they fell onto the road, where a faint trace of blood marked the dust— a heartbreaking and distressing reminder of the accident.

A few minutes later, the police arrived and made a report. "One person killed, one car damaged in a road accident." However, who was the victim? A mother out shopping, a father returning from work, or a student on her way to university? This was one of many tragedies that could have been avoided if people had followed three simple rules: first, concentrate; second, think ahead and third, use clear signals to communicate their intentions to others.

A driver loses control whenever attention drifts — whether to the scenery, to conversation, or to thoughts unrelated to driving. To avoid accidents, drivers should anticipate potential dangers — not only reacting to what is happening, but also predicting what might occur next.

Finally, drivers must clearly warn other road users of their presence and intentions. If they turn, change lanes, or overtake without signaling or giving proper warning, they may, at best, alarm others, or at worst, cause a fatal accident. Responsible driving depends on three essential habits: concentration, foresight, and communication. Following these simple principles can prevent countless tragedies.

Choose the correct answer from a, b, c, or d:

1. The suitable title of this passage is "……".

a) Drivers should always use the phone when driving to avoid accidents
b) Pedestrians need to stay alert, so drivers do not hit them
c) Drivers should use signals and warnings to let others know what they plan to do otherwise, they may cause casualties
d) Drivers only need to signal when motorists are driving near them

4. The driver's distraction with the shops tragically resulted in …… .

a) a damaged car, but no one was seriously injured
b) one casualty and a ruined vehicle
c) two victims and a destroyed car
d) an injured driver and a pedestrian lost his life

5. According to the passage, many accidents could have been prevented if …… .

Read the following passage, then answer the questions:

Travel sickness is confined more to children. The all-too-familiar symptoms of vomiting, sweating, and headache affect adults too, more often women than men. Even so, children between three and twelve are those most at risk of losing their breakfast when traveling.

Travel sickness occurs when the information supplied to the brain by the eyes, the inner ear, and the sense of physical movement is giving contradictory information. This confusion is experienced when a person is subjected to repeated movements while the body is still at rest.

The center that brings about the attack of motion sickness is the inner ear, providing as it does, a complex mechanism responsible for balance. If the nerve supply to the inner ear is destroyed, a person no longer suffers motion sickness.

So, it is important for a person who feels a little bit uneasy while traveling to lie as flat as possible and close his eyes. It's advisable to fix his vision on distant objects or on the horizon. Reading, map-reading and some forms of game-playing are inadvisable. Windows should be open as fresh air helps, and adults who are easily affected by travel sickness should avoid too much drinking or smoking before traveling. As a remedy, there are some pills known as K-Wells. They are taken half an hour before traveling. They melt in the mouth and this makes them quick-acting. These pills may cause sleepiness or dry mouth. Doctors who prefer natural remedies recommend ginger in one of its many forms.

Choose the correct answer from a, b, c, or d:

12. What would be the most suitable title for this passage?
    a) Why Modern Travel is Harmful to Human Health.
    b) The Causes and Prevention of Motion Sickness.

    d) The Importance of the Inner Ear in Human Balance.

13. According to the text, who is most susceptible to travel sickness?
a) Adult men who smoke or drink before their trips.
b) Women who travel frequently over long distances.
c) Children who are between three and twelve years.
d) People who have damaged nerves in their inner ear.

14. What is the primary biological cause of motion sickness?
a) Conflicting signals sent from senses to the brain.
b) The stomach reacting to a very heavy breakfast.
c) A complete lack of fresh air inside the vehicle.
d) The physical exhaustion of sitting for a long time.

15. The underlined word "inadvisable" in the third paragraph most likely means ..... .
a) something that is recommended by many experts
b) an action that is considered wise and helpful
c) a task that requires a lot of mental concentration
d) something that is not sensible or not suggested

16. What can be inferred about the role of the inner ear?
a) It is the main organ responsible for human sight.
b) It triggers sickness by processing physical balance.
c) It functions better when the person is lying down.
d) It is only active when a person is reading a map.

17. Which of the following is a drawback of using K-Wells pills?
a) They take a very long time to start working.
b) They must be swallowed with a lot of water.
c) They might lead to feeling thirsty or drowsy.
d) They are only effective for very young children.

18. Why does the author suggest looking at the distant horizon?
a) To help the eyes align with the body's movement.
b) To distract the mind from the feeling of hunger.
c) To improve the person's ability to see far away.
d) To enjoy the natural scenery during the journey.

19. Based on the passage, how does ginger differ from K-Wells?
a) Ginger is more effective for adults than children.
b) Ginger needs to be taken an hour before starting.
c) Ginger causes more side effects than chemical pills.
d) Ginger is a natural cure favored by some doctors.

Read the following passage, then answer the questions:

Heba was a member of the school's football team. Last Tuesday, her school had a friendly match against another school. It was a grueling match as both teams were equally skilled. Many of Heba's schoolmates were at the stadium to lend the team their support. They had banners, pom-poms, and the school flag.

At one point in the match, Heba had the ball. She was dribbling it towards the goal when suddenly, she was tackled by a member of the other team. She tripped and fell. A spasm of pain shot up her leg, and she cried out in agony. Immediately, she was taken off the field. It turned out that she had fractured her shinbone.

As a result of that match, Heba's leg was in a cast. She had to be pushed around in a wheelchair for the next three weeks. She felt so incapacitated. Heba's classroom was on the third floor. However, due to her temporary immobility, the school principal had granted special approval for her class to shift to the ground floor until her leg had healed.

Despite this, there were still several classes that simply could not accommodate such a move. The music class was on the second floor and the science laboratories were on the third floor. Heba would have to wheel herself to the stairs, then make use of a pair of crutches to ascend the stairs slowly and carefully. Thankfully, she had wonderful classmates who were ready to help whenever needed.

Heba never forgot the kindness of her classmates. Heba's parents invited them all to their house and treated them to pizza as a way of showing their appreciation. Heba felt very fortunate to have such amazing friends.
