Reading Text

Last Saturday, I experienced the most mortifying(1) situation of my life while hanging out(2) with my friends. We had decided to hit the town and celebrate Rawan's promotion(3) at a cool downtown restaurant.

Everything started perfectly. We were having a wonderful time, laughing and catching up on old times. The atmosphere was lively, and everyone seemed cheerful – quite the opposite of our usual dull weeknight(4) gatherings. I was feeling confident and sociable, completely unaware of the disaster(5) that was about to happen.

When the waiter brought our food, I reached for the salt shaker(6). Owing to my clumsiness(7), I knocked over not just my drink, but also Sarah's juice, which splashed all over her brand-new white dress. The silence that followed was unbearable. Sarah looked annoyed, and I felt absolutely helpless.

Sarah was upset, and she went to clean her dress. When she came back, she found me pale as a ghost. Sarah felt how embarrassed I was, and told me that such incidents happen all the time. At this time, I realized how important it is to have true friends who stand by your side in thin and thick. I also learned to be more careful.

3. How does this story show the value of true friendship?

a) True friends always buy gifts for each other.
b) True friends forgive mistakes and support each other.
c) True friends never make mistakes.
d) True friends never go out together.

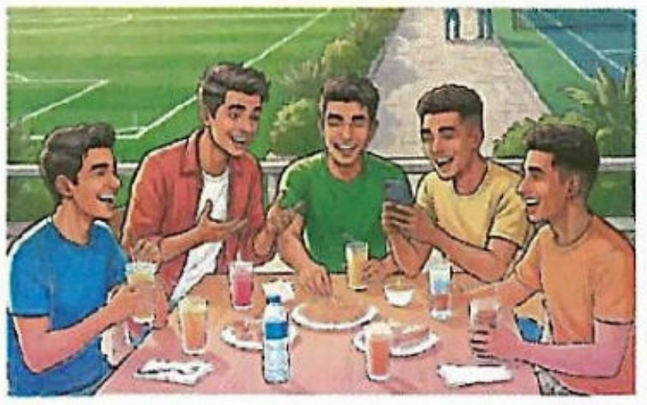

4. If you were Sarah, how would you have reacted in that situation?

Listening Text

Have you ever wondered why hanging out with friends makes you feel so good? Research shows that socializing(1) has incredible benefits for both our physical and mental health(2). When we spend time with others, our bodies release hormones(3) that reduce stress and boost our mood. Regular social interaction can actually strengthen our immune system(4) and help us live longer lives. People who maintain(5) strong friendships tend to have lower rates of depression and anxiety. But the benefits go beyond health. Socializing helps us develop better communication skills and increases our confidence in social situations. When we share experiences with friends, we create lasting memories and feel more connected to our community. However, quality matters more than quantity. Having a few close friends is more beneficial than knowing many people superficially. Face-to-face interaction(6) is particularly powerful, though online connections can also provide support. So next time someone invites you to hang out, remember: you're not just having fun, you're investing in your well-being.

Have you ever wondered why spending time with friends feels so good? Scientists have discovered that socializing isn't just fun — it's actually essential for our mental and physical well-being.

When we hang out with friends, our brains release chemicals that make us feel happy and relaxed. Regular social interaction[1] helps reduce stress, boost our immune system, and even helps us live longer. People who maintain strong friendships tend to be more confident and better at handling life challenges.

But hanging out with friends offers more than just health benefits. It's also how we learn important social skills. When we chat with friends, we practice communication, learn to compromise[2], and develop empathy. These skills help us in school, at work, and in relationships throughout our lives.

However, making plans with friends isn't always easy in today's busy world. Many people struggle to find time in their packed[3] schedules. Technology can be both beneficial and harmful[4] — while it's easier to stay in touch through social media and texting, some people prefer online interaction to face-to-face meetings. Others find it overwhelming[5] to choose from so many entertainment[6] options available today.

Another challenge is that as we get older, our friend groups often change. People move away, start new jobs, or develop different interests. This means we sometimes need to make an effort to maintain old friendships while also being open to forming new ones.

Despite these challenges, the effort to hang out with friends is always worth[7] it. Whether you're having coffee, going to a movie, or just talking on a park bench, these moments of connection are what make life meaningful. So next time a friend suggests hanging out, remember—you're not just having fun, you're investing in your health and happiness.

(5) ممتن (6) لاينسى

Last Saturday, Hind spent a wonderful day with her friends. The weather was sunny and the sky looked a clear blue. In the morning, she met her friends at the park. They had brought sandwiches, fruit, and juice to share. Everyone laughed as they sat under a large tree talking about their week. One of her friends asked Hind if she had finished her school project and she replied that she had already completed it. After lunch, the group decided to play games. They ran races[1], played football, and took funny photos together. Hind mentioned that the park was the perfect place to relax and her friends agreed with her. Another friend wondered whether they could come back the next weekend and Hind said that she would love to. Later, they walked by the lake watching the ducks swim peacefully[2]. The gentle breeze[3] made the afternoon even more enjoyable[4]. In the evening, Hind and her friends went to a small café near the park. They ordered ice cream and shared stories about school and family. Hind said it was the happiest day she had had in a long time. She felt grateful[5] for her caring friends and promised she would spend more time with them. It truly was a beautiful and unforgettable[6] day.

Important Notes

1 إذا كانت كلمة الاستفهام تسأل عن الفاعل مثل who وwhat فلا يأتى الفاعل بعدها.

Direct	Indirect
The policeman said, "What caused the fire yesterday?"	The policeman asked what had caused the fire the day before.

2 نستخدم to + inf. بعد whether/what/where/how إذا كان الفاعل قبل فعل القول هو نفسه الذى سيقوم بالفعل فى الجملة الاستفهامية.

Direct	Indirect
He said to himself, "Where shall I go?"	He wondered where to go.
Sara said, "How can I solve the problem without asking anyone?"	Sara asked herself how to solve the problem without asking anyone.
"Should I accept the offer or not?" he thought.	He wondered whether to accept the offer or not.

أما إذا كان الفاعل مختلفًا، فلا يمكن استخدام هذه القاعدة.

Direct	Indirect
He asked me, "Where should you go?"	He asked me where I should go.

3 من الممكن أن تستخدم كلمات الاستفهام كروابط بين جملتين.

Direct	Indirect
"When I finish my course, I'll apply for a job."	He told me that when he finished his course, he would apply for a job.
"I'll ask Ali for help when I see him."	He said (that) he would ask Ali for help when he saw him.

4 لاحظ عندما تبدأ الجملة بـ if الشرطية وليست الرابطة التى تساوى whether.

Direct	Indirect
"If I were rich, I'd buy a villa overlooking the Nile."	My friend said (that) if he were rich, he'd buy a villa overlooking the Nile.

هنا if من أصل الجملة وليست رابطًا لأن الجملة مازالت «مباشر» وهى جملة خبرية. ولو حذفنا that فستصبح if بعد said وهذا على عكس شكلها فى الجملة الاسفهامية المحولة وهى بعد asked/wondered.

5 لاحظ ربط الجملة الخبرية بالاستفهامية واستخدام and asked.

Direct	Indirect
He said, "I have done my homework. Have you done yours?"	He said that he had done his homework and asked if I had done mine.

6 يمكن أن يكون فعل القول asked محولًا للمجهول was asked مثل:

I ..... if I had written the reports before leaving the office. (asked- was asked)

فلو اخترت asked فمن سألت؟ لكن الجملة من المفروض أنها مبنية للمجهول بمعنى «سُئلت» فالاختيار was asked.

7 نستخدم whether وليس if بعد حروف الجر.

Direct	Indirect
"Should the tax be increased?"	There was a discussion about whether the tax should be increased.
"Are you certain about if the meeting will be postponed?"	He inquired about whether I was certain the meeting would be postponed.

8 عند تحويل الأسئلة التى تعبر عن (عرض، اقتراح، طلب) يكون السؤال فى ظاهره استفهاما، لكن وظيفته اللغوية مختلفة، وهنا نغير الفعل المنقول تماماً:

Direct	Indirect
"Shall I help you?" (Offer عـرض)	He offered to help me.
"Shall we go to the cinema?" (Suggestion اقتـراح)	He suggested going to the cinema.
"Could you open the door, please?" (Request طلـب)	He asked me to open the door.

9 يتم حذف السؤال المذيل تمامًا (Question Tag) عند التحويل إلى الكلام غير المباشر، ونستخدم فعل قول مناسبًا لنقل نفس المعنى.

Direct	Indirect
"You live in Cairo, don't you?"	He asked if I lived in Cairo.
"She doesn't live here anymore, does she?" he said.	He doubted that she still lived there.
"You weren't serious, were you?" she asked.	She wondered if I had been serious.

A Wonderful Stay at The Wonder Hotel

Introduction	My recent stay at the Wonder Hotel was fantastic, and I would highly recommend it. In this review, I will detail my experience from the moment of my arrival until my departure.
Body Paragraphs	The best feature was the stunning view of the sea from our balcony, which was absolutely breathtaking. Our room was also very clean, spacious, and comfortable. The staff were another highlight; they were incredibly friendly and helpful throughout our visit. However, the breakfast selection was a bit limited and could offer more variety, especially for vegetarian guests. The Wi-Fi in the rooms was also occasionally slow.
Conclusion	Despite these minor issues, the excellent service and beautiful location made our trip unforgettable. I highly recommend this hotel for couples or families looking for a relaxing beach getaway.

قاموس بالكلمات الجديدة في قطع الفهم نهاية الكتاب.

1 Read the following passage, then answer the questions:

By the year 2100, the world will be transformed by incredible advancements in technology. Scientists and engineers are already working on innovations that could change how we live, work, and communicate. One of the most exciting developments is the growth of artificial intelligence (AI). In the future, AI may become even smarter and help people with daily tasks, from cooking meals to providing medical advice.

Space exploration will also reach new heights. By 2100, humans may have established colonies on Mars and other planets. Advanced spacecraft will travel farther into the universe, helping us discover new worlds and possibly other forms of life. Technology will also improve life on Earth. Renewable energy sources like solar and wind power will become the main sources of electricity, reducing pollution and protecting the environment.

Education will change dramatically as well. Virtual reality (VR) and augmented reality (AR) will make learning more interactive and fun. Students will take virtual field trips to historical sites and even other planets. Teachers will use AI to create personalized lessons for every student, helping them learn at their own pace.

Medicine will benefit greatly from technological advancements. Robots might assist in surgeries with incredible precision, and diseases that are currently incurable may have treatments. People could live longer, healthier lives thanks to biotechnology and medical research.

Transportation will also evolve. Self-driving cars will become the norm, and high-speed trains and hyperloop systems will make travel faster and more efficient. Flying cars, once only seen in movies, could become a reality.

While these advancements promise a better future, they also raise important questions. How will society handle the ethical challenges of AI and biotechnology? 2 Read the following passage, then answer the questions:

(الاسترشادى ٢)

Organic food has become more popular in recent years as people seek healthier eating habits and more sustainable food choices. Organic food is grown without synthetic pesticides, chemical fertilizers or genetically modified organisms (GMOs). Instead, farmers use natural methods, such as crop rotation and biological pest control. These practices help reduce harmful chemical remains in the soil, air and water.

Many consumers believe that organic food is better because it contains fewer artificial substances and pesticides. Some studies suggest that organic fruits and vegetables have higher levels of vitamins and essential nutrients, which may contribute to overall well-being. Additionally, organic farming prohibits the use of artificial preservatives, colors and flavor enhancers, making organic food more natural. However, one of the biggest challenges of choosing organic food is its cost. Organic products are often more expensive than conventionally grown food due to higher production costs and lower crop yields, making them less accessible to people on tight budgets.

Organic farming also benefits the environment. It reduces pollution, helps conserve water and prevents soil erosion. Additionally, it promotes biodiversity by supporting a variety of plants, insects and animals, creating a healthier ecosystem. Livestock raised organically are given organic feed and are not treated with antibiotics or synthetic growth hormones, which contributes to healthier and more humane farming practices.

Despite these benefits, some experts argue that organic farming cannot produce enough food to feed the growing global population. Conventional farming methods, which use advanced technology, synthetic fertilizers and pesticides, can produce larger quantities of food more efficiently and at a lower cost.

Read the following passage, then answer the questions:

Who do you think is the most successful? Who do you think is the least successful? In order to answer these questions, we first need to define success. Everyone has a different definition. Many of us place a great value on performance, achievements, or reaching various goals. Others associate success with material goods, measuring it by how much one can acquire. Others measure success by how much they can contribute to the well-being of their families, or to the community and society in general. There are many other definitions, but success is mostly associated with becoming rich, famous, and respected at work. Yet, it doesn't have to be that way.

Being successful could mean simply being satisfied with oneself and one's career. For many people, a successful person is someone who feels that his or her work and life, in general, offer an exceptionally high degree of satisfaction. But how does one get from here to there? How does one reach this feeling of satisfaction with life and career? It seems that successful people consistently do two things: they use their natural abilities in their work, and they set career and life goals.

In other words, successful people choose careers where they can use their natural abilities or do what comes naturally to them. For example, successful teachers are people who instinctively know how to help people learn, and the best doctors are those who know how to listen to people. Successful people know where they are starting from and what direction they want to take their lives and careers, even if it is something as simple and wonderful as raising a happy family. What are your natural abilities? What are your career and life goals? If you can answer these questions, you are on your way to having a successful career and life.

Read the following passage, then answer the questions:

One of England's greatest writers, Charles Dickens, was born in 1812. His father was careless with money. When he was 12, he had to leave school to work in a shoe-dye factory in London because his father had been imprisoned for debt. This experience deeply shamed and frightened the young boy, and those feelings were later expressed in his writing, particularly in his descriptions of the working conditions of the poor in the Victorian factories.

When his father came into an inheritance, young Dickens could return to his school, but the family's fortunes were never very secure. At the age of 15, he left school to join a law firm as a clerk. Then, after four years, he went into journalism, reporting on law cases and parliamentary debates. These work experiences helped to further develop his social awareness, which again would later be reflected in his novels.

Dickens' success as a writer began when he started writing the Pickwick Papers in 1836. These were originally intended as a humorous narrative to accompany a series of drawings. Within four months, he had become famous. The Pickwick Papers were not only humorous but also made a serious attempt to look at the legal system and to show how justice was applied. Also, interestingly, it is a clear illustration of how Dickens' private life was reflected in his work, as Mr Pickwick spent some time in a debtor's prison, just like Dickens' own father.

Dickens' early life had clearly enabled him to write about the poor and dispossessed with understanding and compassion. This compassion also made itself felt in practical ways. He helped to establish a home for destitute women and encouraged slum clearance and developments in sanitary provisions.
