"A Day in the Life of a Hospital Nurse"

Every morning, Nurse Sarah kicks off(1) her day with a strong cup of coffee before her 12-hour shift(2) begins. She is always preparing herself mentally for the challenges ahead. ملاحظات هامة

1

تأتى كلمة last باستخدامات مختلفة.

Subject فاعل **+ last + past simple + when + past simple.**

- I last ate fish when I visited my uncle in Alex. (since)

لتحويل الجملة التى بها last إلى since ننفى المضارع التام.

- I haven't eaten fish since I visited my uncle in Alex.

2 **Subject** فاعل **+ present perfect + since + the last time + subject + past simple.**

عندما يأتى بعد the last time جملة كاملة فى الماضى البسيط تأتى since قبل the last وتكون الجملة الأخرى فى زمن المضارع التام.

- I haven't played tennis since the last time I met Hossam at the club.

3 **The last time + subject** فاعل **+ past simple + was +** مدة **+ ago. (was in +** سنة**)**

لاحظ استخدام the last time فى بداية الجملة وبعدها جملة فى زمن الماضى البسيط.

- The last time Ali played football was 10 years ago. (was in 2016)
- Ali hasn't played football since 2016. (for 10 years)

4 **It's +** مدة **+ since + subject** فاعل **+ last + past simple.** (since/for)

- It's a month since they last played a match.
- They haven't played a match since last month.
- They haven't played a match for a month.

5 **"never" and "ever"**

نستخدم never مع صفات المقارنة و ever مع التفضيل.

- I've never bought a faster car than my new car.
- My new car is the fastest car I've ever bought.

https://t.me/G5_Y5

6 **This is the first time/It's the second time ..... .**

يُستخدم المضارع التام مع تعبيرات مثل This is the first time/It's the second time.

- This is the first time Alaa has visited a European country.

7 **today/this morning/evening/week/month**

يُستخدم المضارع التام مع الكلمات والتعبيرات السابقة إذا كانت هذه الفترات الزمنية مستمرة إلى لحظة الكلام.

- He has written three reports this morning. (هذا الصباح لم ينتهِ، فلربما يكتب تقارير أخرى)

8 **"already" and "still"**

غالبًا ما نستخدم المضارع التام فى النفى مع still قبل have/has ومع already فى السؤال للتعبير عن الدهشة.

- Our bus still hasn't arrived. It's very late.
- Has he finished already? How quick he is!

9 **Subject** فاعل **+ present perfect + since + noun/(v-ing)**

يمكن استخدام الاسم أو الفعل مضافًا إليه ing بعد since والجملة الأخرى مضارع تام.

- He hasn't visited us since his graduation.
- Since arriving in Cairo, Adel has had over 15 job interviews.

10 **since = as (for giving reasons)** بما أن (لأن)

تستخدم since بمعنى (بما أن) (لأن) لإعطاء السبب وذلك عندما يكون السبب معروفًا بالفعل للمستمع/القارئ، أو لماذا اتخذت قرارًا؟

أو عندما لا يكون السبب هو الجزء الأهم من الجملة. وغالبًا ما تأتى جملة since فى البداية.

- Since there's no more business, all of us can go home.
- Since I shall be on holiday with my family tomorrow, I won't do any tasks.

11

يمكن استخدام ever since أول الجملة أو آخرها وتؤدى معنى منذ ذلك الحين.

- Ramy started sailing in 2010 and he's been doing it ever since.

12

نستخدم المضارع البسيط او المضارع التام مع الروابط الزمنية للإشارة للمستقبل.

future +	after before when once till/ until by the time as soon as	+	present perfect/ present simple

- I'll leave the place when / after I've taken the money.

13 لاحظ أن: لا تستخدم when للسؤال عن الوقت مع المضارع التام لأنها تتطلب تحديد وقت و هذا لا يوجد مع المضارع التام ولكن نستخدم since when ثم نضع الماضى البسيط بعد since فى الإجابة.

- Since when have you had your car? - Since last year / 2010.

Present perfect and past simple:

المضارع التام والماضى البسيط:

يستخدم كلا الزمنين (المضارع التام والماضى البسيط) للحديث عن الأحداث والمواقف التى انتهت. والفرق بينهما كالتالى:

Simple Past الماضى البسيط	Present Perfect المضارع التام
- يستخدم الماضى البسيط لحدث تم وليس له علاقة بالمضارع. Hany wrote five reports yesterday.	- يستخدم المضارع التام لحدث تم ولكن له علاقة بالمضارع. I've made a cake. Would you like a slice?
- نحدد متى حدث الفعل مع الماضى البسيط. He went to Aswan last year. I once spoke to Professor Zewail.	- عند استخدام المضارع التام لا يتم ذكر وقت وقوع الحدث. He has gone to Aswan. (He's still there.) I've taken a photo with my favorite singer. (He's still alive.) - لقد التقطت صورة مع المغنى المفضل لدى وهو ما زال حيا.
-ليس للحدث علاقة بالمضارع؛ لأن الدكتور زويل توفى. Dr. Zewail lived in Cairo for two years. (He doesn't live in Cairo now.)	He has lived in Cairo for two years. (He's in Cairo now.)

يستخدم المضارع التام للإخبار عن الحدث، أما الماضى البسيط فلسرد التفاصيل.

Doctors and nurses work hard every single day to care for patients. Their job is never easy. They spend long hours in hospitals and they often miss meals or sleep. Many doctors visit patients, write reports, and make quick decisions that can save lives. Nurses give medicine, check charts[1], and comfort patients. They know their work is important, but it is also very tiring. Hospitals have become really busy recently. Over the years, doctors have faced many challenges and they have learned how to stay strong. Right now, many doctors are seeing patients in crowded clinics[2], while others are performing operations[3]. Nurses are walking from one room to another, answering questions, and giving support. They are always on their feet and they rarely rest during their shifts[4]. Sometimes they feel exhausted, but they continue because patients depend on them. In fact, they have been working long shifts recently and they have treated hundreds of patients this week alone.

Doctors and nurses also suffer emotionally. They see people in pain and they sometimes lose patients even after trying their best. This makes them sad, but they still smile and encourage families. They know their sacrifices[5] bring hope and healing. For years, they have been showing true dedication and compassion, and their efforts have inspired many young people to choose medicine as a career.

1 Read the following passage, then answer the questions:

The profession of nursing is widely regarded as one of the most trusted and essential occupations in the healthcare system. It is a unique field that seamlessly blends rigorous scientific training with a deep sense of human compassion. While doctors and surgeons are primarily responsible for diagnosing complex diseases and performing operations, nurses are the individuals who provide the continuous, around-the-clock care that is vital for a patient's full recovery. They are the primary observers of a patient's condition, carefully monitoring vital signs, administering precise doses of medication, and offering emotional stability during vulnerable moments.

Historically, the role of a nurse was seen as a simple supporting act to the physician. However, the modern era has seen a dramatic shift in this dynamic. As Huda sat at the dining table having her breakfast, she was exceptionally quiet. Her mother thought she was ill and felt her forehead. Huda quickly finished up her food and took out her notes to revise while waiting for the school bus to arrive. She mumbled to herself as she memorized the phrases in her notes. Her mother decided to leave her alone to study.

When Huda arrived at school, she took her seat at the back of the classroom. She wanted to be left alone to revise her work. When the examination began, Huda took a deep breath and tried not to be too nervous. She tried to maintain her focus and appear calm. The examiners looked pleasant enough. They smiled at her when she greeted them. Throughout the examination, they would respond in kind to her answers. She thanked the examiners and walked out of the room. The moment she was alone, she let out a deep breath, as if she had been holding it the whole time. She thought that it went rather well and was a little more relaxed after that.

Read the following passage, then answer the questions: (النموذج الاسترشادى الأول ٢٠٢٦)

In recent decades, the world has faced serious environmental challenges such as climate change, air pollution, and the depletion of natural resources. As a result, many countries have turned to renewable energy sources as a sustainable solution for the future. Renewable energy comes from natural sources that are continuously renewed, such as sunlight, wind, water, and geothermal heat. Unlike fossil fuels, these sources do not produce harmful greenhouse gases when used to generate electricity.

One of the most popular forms of renewable energy is solar power. Solar panels capture sunlight and convert it into electricity through a process known as the photovoltaic effect. The cost of solar technology has dropped significantly over the past decade, making it more accessible to homes and businesses. Another important source is wind energy, produced when turbines convert the movement of air into mechanical power. Wind farms, both on land and at sea, now supply a large portion of electricity in many European countries.

Hydropower, which uses flowing water to generate electricity, remains one of the oldest and most reliable energy sources. In addition, geothermal energy, which harnesses heat from beneath the Earth's surface, provides a steady source of power in countries such as Iceland and New Zealand.

However, renewable energy also faces challenges. Solar and wind power depend on weather conditions, while building large dams for hydropower can affect local ecosystems. To overcome these issues, scientists are working on advanced energy storage systems and more efficient technologies.

Despite these challenges, renewable energy offers a path to a cleaner, healthier planet.

By investing in sustainable solutions today, we can protect our environment and ensure that future generations enjoy a safe and prosperous world.

Healthcare plays a very important role in our lives. It is not only about going to the hospital when we are sick but also about having people who care for us and guide us to stay healthy. Doctors, nurses, and pharmacists are three of the main helpers in healthcare. Doctors examine patients, give advice, and provide treatment when needed. Nurses look after patients in hospitals, check their temperature or blood pressure, and sometimes even visit them at home. Pharmacists prepare and give medicines and explain the right way to use them.

Emergencies can happen suddenly, without warning. A person may have a heart attack, a serious accident, or an asthma attack. In such moments, acting quickly is very important. Ambulances, paramedics, and emergency doctors work together to save lives. For example, when an accident happens on the road, an ambulance rushes to the scene, gives first aid, and takes the patient to the hospital.

Most people also have personal experiences with illness. Some may remember staying in bed with a high fever or needing medicine for an infection.
